Profile

Highly skilled Fullstack Software Engineer experienced in developing customer-centric web applications. Proficient in major web development tools and frameworks to create server side applications. Collaborative team player with a focus on driving project success and enhancing user experiences.

Work Experience

Backend Developer

Credence Real Estate 📄

- Designed and implemented server-side logic, databases, and APIs to facilitate seamless communication between the front-end and server
- Utilized database management systems (SQL and NoSQL) to optimize data storage and retrieval
- Collaborated with cross-functional teams to develop efficient, secure, and scalable web applications
- Ensured robust API design, implementation, and integration to support various client-side applications
- Implemented security measures to protect against common web vulnerabilities and ensure data privacy

Frontend Developer

Forcythe 📄

- Designed and developed responsive, interactive, and user-centric web applications utilizing React, Tailwind CSS and Zustand
- Ensured seamless user experiences across various devices and browsers.
- Collaborated closely with designers and backend developers to create cohesive, high-performing web application.

Frontend Developer (Contract)

Cyberclick Studio 📄

- Developed responsive, user-friendly, and interactive web applications using HTML, CSS, JavaScript.
- Ensured seamless user experiences across various devices and browsers
- Implemented modern frontend build tools and workflows, such as Webpack and Babel
- Collaborated with designers and backend developers to deliver cohesive and functional web applications
- Optimized frontend performance, accessibility, and security to provide an exceptional user experience.

Backend Developer (Contract)

8th Gear Hub (Legal Mo) 📄

- Developed a robust server-side application for user authentication and functionality using NodeJS, ExpressJS, and other cutting-edge backend technologies
- Prioritized data security, implementing best practices and encryption to protect sensitive user information
- Contributed to the continuous improvement of application functionality through rigorous testing, debugging, and refactoring
- Ensured scalability, reliability, and performance optimization, resulting in enhanced user experience and satisfaction
- Collaborated with cross-functional teams to integrate new features, resolve issues, and deliver high-quality software solutions

Coding Tutor

Nigenius Technologies Limited 📄

- Teach high school students and special needs children the fundamentals of computer appreciation, programming, and web development
- Utilized Scratch programming language to introduce students to coding concepts and creative problem-solving

- Instructed students in web development using HTML, CSS, and JavaScript, empowering them to build interactive web pages and applications
- Adapted teaching methods to accommodate diverse learning styles and abilities, ensuring inclusivity and accessibility for special needs students
- Fostered a supportive and engaging learning environment, encouraging students to explore, create, and develop essential skills for the digital age

Skills

JavaScript	React
AWS	NodeJS
ExpressJS	NextJS
MongoDB	TypeScript
PostgreSQL	Python
NestJS	NextJS
Hono	

Personal Projects

Ryde [↗](#)

Ryde WebApp: A ride-sharing marketplace connecting drivers to host and join shared rides. The platform enables seamless booking and ride hosting from specified pickup locations to destination points. Currently serving over **1,000 active users and visitors monthly**, Ryde WebApp promotes cost-effective and efficient travel solutions.

Backsnip [↗](#)

Backsnip contains a collection of pre-written solutions for common backend development tasks, covering various programming languages and frameworks. The goal is to provide a centralized resource for developers to find and reuse solutions, promoting efficiency and collaboration.
